

Fertility service price list at LIPS. Healthcare

Effective from January 2025

We introduced the fertility service at LIPS. Healthcare to provide a bespoke, compassionate, one-to-one patient experience. We recognise that everyone has already been on a journey before contacting us which is why we take time to listen, understand and tailor our services to your individual needs.

Our aim is to provide patients with a positive experience, in collaboration with London's leading IVF units utilising the world's finest technology in assisted reproduction and advanced treatment methods. We have partnered with other leaders in the field of reproductive medicine to offer the highest quality of care and are committed to following the HFEA code of practice and evidence-based medicine.

Our consultants will make our patients feel welcomed, supported and to hope to ultimately fulfil their dreams of achieving a family. We therefore want to ensure prices for services are fair and transparent, with no hidden costs.

Prices of services will be confirmed by us at the time of consultation before our patients commit to having treatment with us. At the point of booking an appointment with us patients are required to complete a patient registration form and history questionnaire. If patients have had treatment elsewhere it is helpful for us to have these documents prior to the appointment so they can be reviewed in advance.
